## Professional Summary

Data and process analytics professional with an MSc in Computer Science and 3+ years of experience across data analytics, business process improvement, and operational reporting. Microsoft Certified Power BI Data Analyst (PL-300) and Lean Six Sigma Green Belt. Delivers SQL-driven analysis, KPI dashboards, and process automation, reducing manual reporting effort by 35% and SLA breaches by 18%. Skilled in SQL, Python, Power BI, DAX, and advanced Excel. Experienced in requirements gathering, root cause analysis, process mapping, and stakeholder engagement across global BFSI and BPS teams.

## Education

- Queen Mary University of London** London, United Kingdom  
*Master of Science - Computer Science* 2022
- Heritage Institute of Technology** Kolkata, India  
*Bachelor of Technology - Computer Engineering* 2021

## Certifications

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)** - Microsoft, Jan 2026
- Lean Six Sigma Green Belt** - Tata Consultancy Services, Jul 2026

## Skills Summary

- Languages:** SQL, Python, Java, C, C++, JavaScript
- BI & Visualisation:** Power BI (PL-300), DAX, Power Query, Advanced Excel, Dashboard Development, KPI Reporting
- Data:** MySQL, PostgreSQL, Oracle, MongoDB, Data Cleaning, Data Transformation, ETL Concepts, Data Modelling
- Process & Business Analysis:** Lean Six Sigma Green Belt, Process Improvement, Process Mapping, Root Cause Analysis, Requirements Gathering, SLA & KPI Management, Report Automation, UAT Support
- Modelling & ML:** Feature Engineering, Model Evaluation, Machine Learning, Computer Vision (OpenCV, YOLO)
- Soft Skills:** Leadership, Stakeholder Engagement, Collaboration, Communication, Training & Mentoring

## Experience

- Tata Consultancy Services Ltd** Kolkata, India  
*Business Process Lead - Data Analytics* May 2025 - Present
  - Led data-driven process optimisation for the NEST Pensions project by analysing 50K+ monthly operational records using SQL and Excel, improving workflow efficiency by 22%
  - Developed Power BI dashboards tracking 15+ operational KPIs, enabling leadership to reduce SLA breaches by 18%
  - Applied Lean Six Sigma and exploratory data analysis (EDA) to identify recurring operational bottlenecks and improve issue resolution speed by 25%
  - Automated recurring operational reports and KPI monitoring workflows, reducing manual reporting effort by 35%
  - Gathered reporting requirements from business stakeholders, documented process flows, and translated operational needs into analytics deliverables
- Diligenta Ltd - Subsidiary of TCS** Peterborough, United Kingdom  
*Quality & Training Coordinator - Data Analytics* Mar 2024 - Jan 2025
  - Analysed 100K+ customer interaction records to identify service performance trends and improvement opportunities
  - Built automated Excel and Power BI dashboards monitoring customer satisfaction, handling time, and operational KPIs
  - Conducted statistical analysis of handling time and resolution metrics across 12 teams, improving average resolution time by 17%
  - Delivered training programmes to 40+ new hires using analytics insights, improving onboarding productivity by 25%
- Diligenta Ltd - Subsidiary of TCS** Peterborough, United Kingdom  
*Customer Support Analyst* Mar 2023 - Mar 2024
  - Resolved 70+ customer cases weekly with a 96% customer satisfaction score by diagnosing technical account issues
  - Used CRM analytics and Excel reporting to identify recurring support patterns, reducing handling time by 20%
  - Collaborated with offshore technical teams on complex issues, improving first-contact resolution by 15%
  - Ranked within the top 10% of a 120+ member support team on productivity and quality metrics

## Projects

- Customer Behaviour Analytics with Machine Learning:** Built a churn prediction model in Python, Pandas, and Scikit-learn on 20K+ customer transaction records, using EDA, feature engineering, and classification modelling to reach 89% accuracy
- Handwritten Digit Recognition:** Developed a machine learning OCR model using Python and the MNIST dataset, achieving 97% classification accuracy through feature engineering and model optimisation
- Smart Traffic Management System:** Built a computer vision traffic monitoring system using OpenCV and YOLO trained on 5,000+ images, achieving 90% vehicle detection accuracy
